

## EDUCATOR ANSWER KEY – STBBI TRANSMISSION RISK CHART

When filling out this chart, ensure that students know that if they place the word “common” under a heading, it does not mean that there is a 100% chance of getting or passing on an STBBI if protection is not used, it means that the likelihood of STBBI transmission is higher than in other cases.

### Chart Key

Common = Infection is commonly passed this way

Possible = Infection can be passed this way with the right conditions

Not Common = Not a common way to pass infection but possible under certain circumstances

Not Possible = No possibility for passing infection this way
